

Premium Performance filter cartridges are manufactured using a proprietary process with FDA compliant materials, KDF media and a specially designed adsorbent medium for heavy metals, lead and mercury reduction.

- 2 micron rating
- High capacity chlorine taste and odor reduction
- High chemical adsorptive capacity
- High VOC and TOC reduction
- 98% reduction of water-soluble heavy metals including lead and mercury

Materials and components used are tested and certified by NSF International against NSF standard 61. Components used for chlorine, VOC and TOC reduction capacities are based on laboratory testing conducted using test protocol contained in NSF standards 42 and 53 respectively.

Specifications and Performance Data

Micron Rating	2 micron nominal
Chlorine Taste & Odor Reduction	3,000 gallons
Chloroform Reduction	250 gallons
Applicable Water Pressure	7~75 PSI
Maximum Operating Temperature	104 °F
Carbon Type	Coconut Shell Carbon
